

Greetings

At the end of Nov 2013 we opened our new clubhouse. The members of the club had a vision and with volunteer help and countless donations from businesses and individuals all over Saskatchewan we accomplished a goal that many thought impossible. Our youth members adopted the club as something to be proud of and I know they also learned that no matter what, hard work and dedication brings great results. The new clubhouse was a huge milestone for the club, past and present members were extremely proud of the final results.

In the early hours of Sunday March 23, 2014 our new Clubhouse burnt to the ground. Needless to say all of our Sno-Drifter members as well as the community are in disbelief and shock. Fortunately nobody was injured; it might just be a building however the hearts of the club members and sponsors is what built it.

We would like to say thanks to the Candle Lake Volunteer fire department for their help to put the fire out. Your group was very professional, helpful and understanding, keep up the good work!

It has been an extremely challenging year, and like the old saying states "what doesn't break you make you stronger" As a group we acknowledge our successes and welcome the challenges.

Thank you to everyone for their support, and we will be back next year with the same great trail system, warm up shelters and hopefully our clubhouse.

Sincerely,

*On behalf of the Candle Lake SnoDrifters
Carey Painchaud, SnoDrifters President*
