

Five Year Plan Proposal

Trails

- 1) Fix low spots on West Side paved trail and then pave them as well as finishing the paving of trail from Island View to Lakeview Drive. (next year, 2015, when the pavement is in town)
- 2) Pave the gravel path from C&S parking lot to Quincy's Corner to give walkers a paved option from C&S to Lakeview Drive. (2015)
- 3) Continue to have all subdivisions connected to a trails system (not on our roadways if possible), paved, chipped or gravel, or a nature path.
- 4) Implement a Village manned and funded maintenance system for all our trails, Volunteers only have so much physical abilities and equipment to keep the trails in the shape that residents seem to want.
- 5) Maintain a painted walking strip on the east side of Simon Lehne for the safety of walkers and cyclists.
- 6) Recognize that when nature deals us extra wet or blowdown conditions that it is OK to have some trails closed due to conditions beyond the villages control.
- 7) Continue to press for a viable paved walking strip on the north side of Main Street from Hwy 265 to Mac Jac's and the Mini Golf for pedestrian safety.
- 8) Continue to communicate to the public via trails pamphlets, improved trail signage and other means to keep safe and accessible foot paths as viable options for residents and tourists alike.
- 9) For practical budgeting purposes a walk through of all trails by an engineer or construction/paving rep is needed by as soon as next year. Proper planning with appropriate dollar figures can then be done.
