

# Resort Village of Candle Lake Roads and You

The Resort Village of Candle Lake is doing an evaluation of the main arterials running through the Village. Once the assessment is completed, the consultant will be providing the Village with options in regards to reconstruction and surface finishes for these roadways. Those options may or may not include paving or other surface applications:

**SHOULD AN OPTION BE TO PAVE SOME OR ALL OF THE ROADWAYS BEING ASSESSED**, there is an opportunity for residents to petition for a local improvement on their street/subdivision and piggy back on the larger project. At this time the Village would like to know if there is interest.

If you and your neighbors would be interested, we ask that you get at least 50% of the residents within your area to sign a request to have your project investigated further. **THIS WOULD BE AN EXPRESSION OF INTEREST ONLY**. The investigation concerning feasibility and costs would be completed by the Engineer managing the larger project. If it were deemed that your project can accept pavement, those costs would be presented to you for a final decision. Your group would then be asked to petition for the local improvement.

We would be prepared to add this on to the work project tender, which is expected to go out early in the New Year if paving is an option. The costs for any work would be shared by the residents listed on the petition. We are not asking at this time for a commitment but rather an expression of interest.

Should your area be interested, further review would occur and your group would have an opportunity to review the cost estimates for your project and make a final determination as to whether or not your group wishes to petition for the local improvement.

Should you require further information regarding local improvements, please visit the web site after Thursday September 26 or please call @ 306 929 2236 advising the staff it is concerning the road improvements.

Joan Corneil, Administrator
