

THE RESORT VILLAGE OF
CANDLE LAKE

PUBLIC NOTICE

Bear interactions have been increasing in the populated areas of Candle Lake. This increase is due to easy access to food left out by residents and visitors to the community.

TIPS TO REDUCE HUMAN-BEAR INTERACTIONS:

- Keep garbage inside your house or in a garage or shed until it needs to be put out for collection.
- Never leave garbage bags outside unless they are in an airtight or animal proof garbage container.
- Place garbage at the curb or roadside no earlier than 7:00 a.m. on your collection day.
- Ensure all recyclables stored outside are rinsed thoroughly.
- Do not store food in fridges or freezers located in screened in porches.
- Do not leave petfood and bowls outside.
- Inform neighbours to ensure your neighbourhood is following all preventative measures to reduce human-bear interactions.
