

Candle Lake Trails Advisory Group Overview

Walking Candle Lake trails (planned and unplanned) has long been a common and favourite activity for residents and visitors alike in our area. The Baldy Trails (summer and winter) which were created by the Provincial authorities and local volunteers are part of the system. Aschim Homestead and trails/boardwalks started by the Aschim family, expanded by the Sask Forestry Association and now maintained by Candle Lakes Communities in Bloom (CiB) are part of the system. More locally and directly under the Candle Lake Trails Advisory Group, as an affiliate of the Parks & Recreation, trails have been developed with 3 different areas of focus:

- 1) Safety walking trails – designed to move people around the core Waskateena Bay area from Fisher Creek area, past Waskateena and up to Nobles Point
- 2) Connecting walking trails – designed to connect where possible subdivisions built in the past as well as the future to the downtown core.
- 3) Nature trails – designed to create and promote activity walks into the forested areas around Candle Lake as well as much of the shoreline interface with our local water bodies.

Formally created in the early 2000's CLTAG has a mandate to plan, design, and promote activity trails for walking and biking in the Resort Village of Candle Lake.

Key to the success of this group are the trail volunteers and active walkers and cyclists who see walking and cycling as an important aspect of resort life. Any persons who have an interest in helping maintain and build these trails or serving on the Trails Advisory Group are asked to contact the Village office (306) 929-2236.
