

Community Services Department
**BUILDING STANDARDS
BRANCH**

The Resort Village of Candle Lake Building Standards Branch has initiated a mandatory (call in) building inspection program to accommodate contractors and or property owners who have acquired a building permit for a development.

There will be three important building inspections required:

1. An inspection before you place any concrete in your foundation forms.
2. A framing inspection before you insulate.
3. An inspection directly after the insulation and vapour barrier installation.

Accessory buildings require only # 1 & 2 foundation & framing inspections.

Your call in time and date will be recorded, the inspector will require a maximum time of 48 hours or two working days to respond to your call. Call in # 929-2210 or 961-8721
