

THE RESORT VILLAGE OF CANDLE LAKE
IN COOPERATION WITH
THE
MINISTRY OF TOURISM, PARKS, CULTURE & SPORT (TPCS)

Will be conducting an aerial spraying program utilizing
the biological insecticide Foray 76B
which contains the naturally occurring bacterium
Bacillus thuringiensis var. Kurstaki (Btk)
against the eastern spruce budworm
to protect the white spruce within the Resort Village of Candle Lake
and Candle Lake Provincial Park.

Two applications will be conducted between approximately
June 1 to June 15, 2010.
As the program nears, actual dates of application will be posted.

Information on Btk and Foray 76B
can be obtained at the following websites:

http://www.hc-sc.gc.ca/cps-spc/pubs/pest/_fact-fiche/btk/index-eng.php
